

# Rods

For your work at torch or kiln, drawn from Bullseye Compatible glass.

Dora Schubert, *Window Beads*, 2008.  
Torchworked glass, 15 mm x 16 mm (each bead).

## LUSTRE RODS

These luxurious rods have a metallic sheen that can be coaxed to the surface in the torch by finishing with a reduction flame. Due to the precious metal content, lustre rods are more costly. Not intended for kilnforming. Find tips on using lustres at [www.bullseyeglass.com/torchtips](http://www.bullseyeglass.com/torchtips)

### ROD NOTES

To learn about the performance characteristics of specific rods, visit [www.bullseyeglass.com/education/torchtips](http://www.bullseyeglass.com/education/torchtips)

Many of these colors are also available as billets, frits, stringers, and confetti.

### READING THE COLOR SWATCHES

To indicate which rods strike, the round ends have been worked in the flame.

Some of the beads shown include a white core of French Vanilla (000137-0576) wrapped in Clear (001101-0576) and topped with colored dots. Darker transparent colors are shown with the color wrapped around a core of Dense White (000313-0576).

✦ This style may not reveal (or strike to) its target color until worked in the torch. The cold color may or may not match the torchworked color as shown here. For more information, see page 4.

✧ In this "shift" style, the hues of colors change, depending on thickness and/or lighting.

### ORDERING

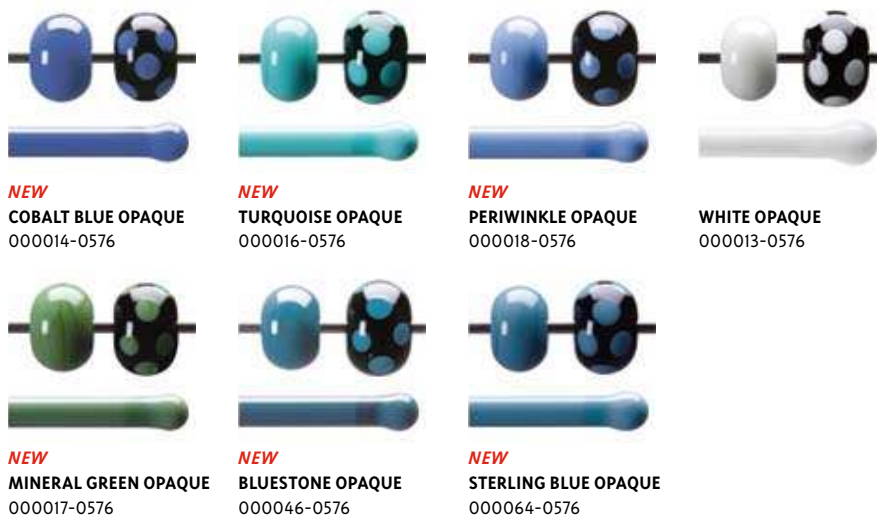

Rods may be purchased individually or by the pound or half pound (approximately eighteen to twenty rods per pound; fourteen per pound for lustres).

For the Torchworking Sample Set, see page 36. For rod assortments (Hot Rodz Pack and One-of-Each Rod Pack) see page 34.

To learn about our color, form, grade, and size codes, see pages 56–57. For pricing, see pages 60–67.

## OPAQUE RODS

New Opaque Rods. White Opaque is joined by six rod colors that reflect light to give surface details extra contrast. To show the density of the colors, these new styles are demonstrated on black core beads. Not intended for kilnforming.

**NEW**
