

Evenheat Kiln GTS 2541

With Viewing Window & Hand Held Controller.

Firing Chamber Dimensions and Options:

*The chamber dimensions are:
104cm long x 65cm wide x 34cm deep*

Voltage and Phase Configurations:

*240V, 3 phase (delta), 26A
OR
240V, single phase, 40A*

Watts: 9600W

Shipping Weight: 127kg

Suitability & Recommended Kiln Furniture

The GTS 2541 is capable of all glass related firing up to 982°C.

The GTS 2541 is designed to fire a single layer or shelf. The nature of the GTS 2541 is to provide heat from the lid elements directly to the shelf containing the glass. Attempting to fire glass below the top shelf is likely to lead to frustration and disappointment. So...one shelf only.

Given the nature of the "oval" shape of the firing chamber, the GTS 2541 uses multiple shelves to create one shelf layer

For larger fused pieces where seams are unacceptable there is a full shelf available. This shelf is made of a lighter weight material and is custom cut to fit the GTS 2541. (Part #7439) This full shelf needs support by the multishelf system or can be laid directly on the kiln floor. Prices on this shelf can be requested if required.
