

*The Kiln: A SKUTT workhorse, built to last and backed with a 2-year parts & labor warranty.*

*The Controller: The upgraded GlassMaster LT Controller, developed especially for the HotStartPRO, is fully pre-programmed to successfully fire and anneal glass projects up to 3/8-inch (9 mm) in finished thickness.*

*You first choose AUTO(matic) or PRO(fessional) programming. The AUTO mode is preset for Full/Med/Tack Fuse or Slump (optimized for System 96 products), with opportunities to adjust speed and hold times/temps.*

*The PRO mode walks you through up to 8 segment settings for each of 5 custom programs. The custom programs are retained in the controller's memory for results you can count on every time you fire.*

*In either mode, you can elect to **ADD Time** and/or **ADD Temperature** on the fly, allowing precise control over heatworking. And, when your project is "just right," you can choose **SKIP STEP** and the intelligent Glassmaster LT jumps right to the next segment.*

*The HotStartPRO is the NO-COMPROMISES kiln for the glasscraft studio.*

*The HotStartPRO comes complete with sturdy steel stand, porcelain peephole plug, 13-inch round kilnshelf, three 1-inch posts, 8 ounces of shelf primer, and enough ThinFire shelf paper for three full-shelf firings.*

## **SPECIFICATIONS:**

**Opening:** 380mm

**Depth:** 165mm

**Shelf:** 330mm diameter

**Voltage:** 240

**Amp:** 7.5

**Max Temp:** 927°C

**Shipping Weight:** 46kg
